

The 2013-2014 Flu Season Is Rapidly Approaching

The Center for Disease Control and Prevention reported on Thursday, June 13, 2013 that 19 children died from influenza in the United States last year. This is a significant increase from the 10 children who died in 2012. The CDC also reported that there were 1.5 million hospital admissions in 2012-2013 (The New York Times June 13, 2013).
